PROJECT
Development

With decades of experience

at your side.

You hand over the planning and construction of your food production facility to us and therefore rely on cost certainty, adherence to delivery dates and excellent quality of execution.

We know the special features of the food industry, coordinate all subcontractors for you and support you in coordinating your future operating processes.

Experienced specialists from the domain of architecture, technical building equipment, structural planning, project management, production and logistics work together on the implementation of your project.

BRUCHA Food Engineering

We accompany you

- from the first idea -
