

Our company recognises the importance of waste management and its impact on the environment. We strive to minimise waste production through the use of reduction, reuse and recycling techniques at every stage of our operations. We are committed to ensuring that all operations and activities are fully compliant with all current waste management legislation.

Goals

- > To minimise waste production
- > To operate in full compliance with environmental legislation

Policy

The objectives of this directive are:

- > To ensure that waste management is carried out in accordance with all waste legislation requirements, including duty of care, and to plan for and mitigate the impact of future legislative changes
- > To minimise waste generation at source and facilitate repair, reuse and recycling via disposal of waste in a cost-effective manner
- > To provide clearly defined roles and responsibilities to identify and coordinate each waste management activity
- > To promote environmental awareness to increase and encourage waste minimisation, reuse and recycling
- > To invest in the expansion of recycling facilities on the plant site and convert waste into value-added products
- > To ensure safe handling and storage of waste on the site
- > To provide appropriate training to employees and other stakeholders on waste management issues
- > To promote a holistic approach to waste management on the site

Compliance and enforcement

We are all responsible for complying with this directive and for following supporting company standards, procedures and processes. We consider violation and non-compliance with this directive to be serious issues. Depending on the circumstances, a breach of the directive may result in local disciplinary action.

Exception handling

Exceptions to this directive require prior written approval from their directive approver. Unless exception conditions exist, exceptions will not be granted.
